

HYDRAULIC HOSE REEL

DHR 50M - Hydraulic Hose Reel

Manual hose reel with three-line swivel joint

length 50 m - diameter 3/4"

- *Manifold complete with quick coupling and pressure relief valve to connect the DHR50M to the control unit*
- *Hydraulic swivel joint with 3 hydraulic lines: Pressure - Return - Drain*
- *Manual rolling with mechanical gear reducer*
- *Central hook for lifting with a crane. Also available is a transport pallet with 4 lifting hooks and stackable*
- *Front roller guide for umbilical and hydraulic hose limit switches*

Made from high-quality materials and designed for professional applications, the **DHR50M** hose reel is ideal for shore/offshore work, liquid pumping and activities with large hydraulic flow rates at considerable distances from the power unit.

Accessories: external structure for handling by forklift and stackable.

Pipe length and diameter dimensional depending on hydraulic flow rate - consult DOA.

TECHNICAL CHARACTERISTICS	DHR 50M
Trolley dimensions LxWxH (cm)	120x80x120
Full weight (kg)	250 (including 50m of 3/4" hose)
Hydraulic pipe diameter	1/2" - 3/4" - 5/8"
Hydraulic pipes R2 pressure R1 return - umbilical-effect	50 METERS WITH 3/4" HOSES (P-D-T) 40 METERS WITH 3/4" HOSES
Max inlet pressure	350 Bar (in static operation)
Hydraulic block	anodized aluminum
