

DIAMOND CHAIN SAW

HDS 5 - HDS 6

Motor operating speed up to 7000 rpm

- Ergonomically redesigned handle for superior comfort in operation
- Side handle rubbered for an ergonomic grip
- High speed hydraulic motor
- Motor detail of our production, capable of running up to 7000 rpm continuously. 
- Quick tension system to adjust chain tension (Patented)
- Full body in aluminium with anodized specialty inserts
- Bubble level
- Flush cut

Available in
underwater version

The diamond chain saw is suitable for precise cuts with edges or in flush cutting mode in concrete and building materials. It is also suitable for cutting cast iron or iron pipes. The innovative patented system, Quick Tension, allows smooth and fast management of the chain tension without disassembling the side casing and facilitating the operator in awkward situations or in underwater applications.

TECHNICAL CHARACTERISTICS	HDS 5	HDS 6
Weight (kg)	13kg with bar & chain 40cm	13kg with bar & chain 65cm
Dimension LxH (cm)	62x30	85x30
Width (cm)	24	24
Ideal flow L/min	30	45
Hydraulic pressure Bar	175	175
Motor operative speed	6000 rpm	7000 rpm
Flash Cut	yes	yes
